

# 14'x12' Insta-Clip™ Screen House

Instructions apply to Part Number 9392-142

## When You Are Ready To Assemble Your Shelter

- Select a level campsite clear of rocks, branches and other hard or sharp objects.
- Do not assemble your shelter under trees.
- For easier setup, two or more people are recommended.
- Place fabric in center of selected location and assemble poles above fabric.

## POLE ASSEMBLY PARTS

Poles Part No. 9392-224

Hub Part No. 9392-223

## 1 Assemble Frame

- You will need to assemble and connect one pole at a time to the hub.
- Do not completely assemble poles.
  - a) Beginning at spring-clip end of pole, assemble all but the last shock-corded section. The pole and one section should curve downward (Illus. 2).
  - b) Insert the spring-clip end into one of the hub ports until it clicks into position (Illus. 1, 2).
  - c) Repeat for each of the five remaining poles (Illus. 2).

Poles inserted  
into hub

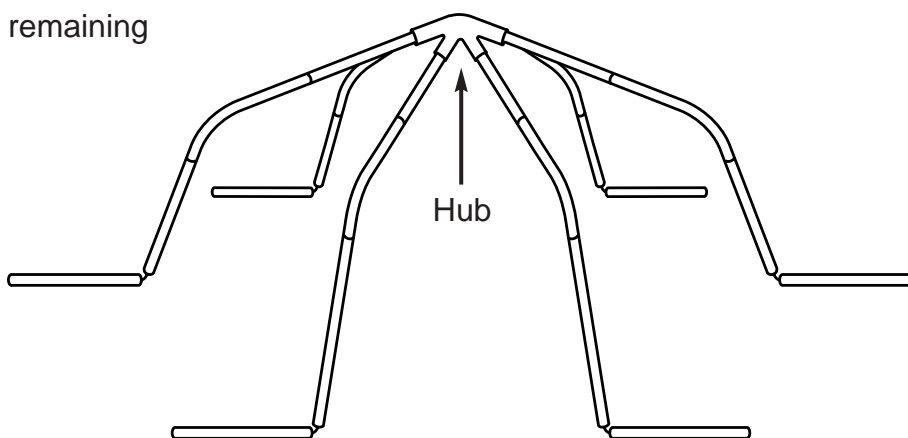

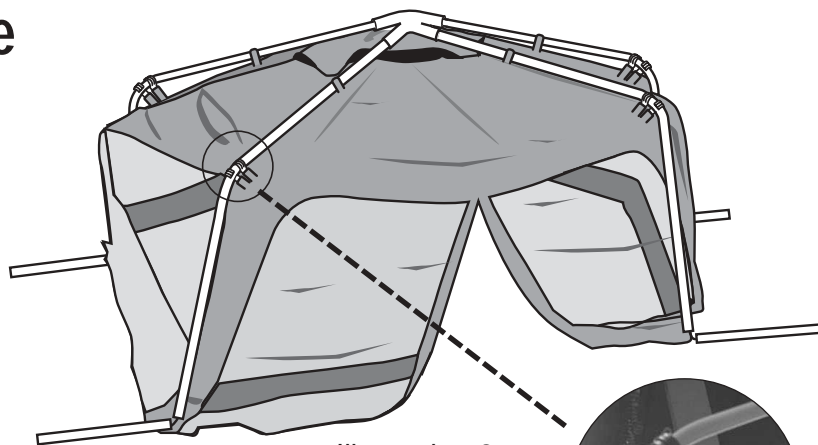

Illustration 2  
Partially assembled  
frame locked into hub

## 2 Attach Shelter to Frame

- Clip center of shelter roof to bottom of hub.
- Clip shelter to frame, positioning doors in desired direction (Illus. 3).
- CornerRadius have two clips, so snap one into clip bracket.
- To fully extend each pole, interlock all shock-corded pole sections.
- Insert straight pin into base of pole (Illus. 4).

## 3 Stake Down Shelter

- Adjust poles to pull shelter taut and insert larger stake downward through fabric loop at end of each pole (Illus. 5).
- Attach guylines to fabric and stake down using metal stakes (Illus. 6).

### Things You Should Know

- Never store shelter, even for a short period of time, without drying thoroughly and brushing off caked dirt. Do not pack stakes or poles inside your shelter. Use separate storage bag.
- STAKES SHOULD BE REMOVED BY PULLING ON THE STAKE ITSELF. NEVER PULL ON FABRIC OR STAKE LOOP TO REMOVE STAKE.
- POLES SHOULD NOT BE LEFT TELESKOPED TOGETHER DURING STORAGE.
- Do not leave your shelter set up for weeks at a time. Be aware that exposure to ultraviolet rays of the sun can seriously damage material and/or cause it to become discolored.

**WARNING: KEEP ALL FLAME AND HEAT SOURCES AWAY FROM SHELTER FABRIC.** This shelter meets the flammability requirements of CPAI-84. Fabric will burn if left in continuous contact with any flame source. Application of any foreign substance to the fabric may cause flame-resistant properties to become ineffective.
